Dr. Vijayakrishna Kari

Worksheet-4

1. **Write the synthetic procedure, properties, and applications of the following polymers**

   a). ABS b). PVC c). PC d). Bakelite

2. **Write a note on**

   a). Absorbable sutures b). Breathable packing material for fruits and vegetables.

3. **Vapour pressure and Crystallography can be used to measure the properties of small molecules (low molecular weight) but not those of polymers. Explain**

4. **Viscosity, Light Scattering and Osmotic Pressure techniques are used more often for analyzing macromolecules than small molecules. Reason it out.**

5. **Name some commodity polymers and classify them as thermoplastic and thermosetting.**

6. **What kind of polymers will be obtained in the following reactions?**

1. 
2. 
3. 
4. 
5. 
6. 
7. 
--X--
