Assignment: SHEET – 2B

1. One end of line AB is 10mm above Hp and other end is 100 mm in-front of Vp. It's FV is 45° inclined to xy while it's HT & VT are 45mm and 30 mm below XY respectively. Draw projections and find TL with its inclinations with HP & VP.

2. A line AB is 75 mm long. It's FV & TV make 45° and 60° inclinations with X-Y line respectively. End A is 15 mm above HP and VT is 20 mm below XY line. Line is in first quadrant. Draw projections, find inclinations with HP & VP. Also locate HT.

3. End A of a line AB is 25mm above HP and end B is 55mm behind VP. The distance between end projectors is 75mm. If both its HT & VT coincide on XY in a point, 35mm from projector of A and within two projectors. Draw projections, find TL and angles and HT, VT.

4. A line AB, inclined at 40° to the VP has its ends 50 mm and 20 mm above the HP. The length of its front view is 65 mm and its VT is 10 mm above the HP. Determine the true length of AB, its inclination with the HP and its HT.
