Auto CAD sheet I 2022-23

1. One end of line AB is 10 mm above HP and other end is 100 mm in-front of VP. Its FV is 45° inclined to ground line XY while its HT and VT are 45 mm and 30 mm below XY respectively. Draw projections and find true length and its inclinations with HP and VP.

2. Draw the projection of a cylinder 75 mm diameter and 100 mm long, lying on the ground with its axis inclined at 30^0 to the V.P. and parallel to the ground.

3. A square pyramid, base 40 mm side and axis 65 mm long, has its base on the HP and all the edges of the base equally inclined to the VP. It is cut by a section plane, perpendicular to the VP, inclined at 45° to the HP and bisecting the axis. Draw its sectional top view, sectional side view and true shape of the section.
